Terms and Conditions

Continental Plastic, Corp. is a leading manufacturer of artificial insemination and veterinary supplies for the A.I. industry. Continental Plastic manufactures products in food safety and sanitation industries which are an important part of our business. We are able to offer extremely competitive pricing as most products are manufactured at our facilities in Delavan, Wis., USA. We believe price, quality and customer service have been our keys to success and growth. We are committed to our mission and continually work to ensure our customers the finest products available. Our customers are a vital part of our organization. We welcome comments, suggestions or questions regarding any product or service.

RETURNED GOODS POLICY No merchandise is to be returned to Continental Plastic Corp., without customer requesting and receiving prior approval. All returns are subject to a 10% restocking charge. Return and exchange privileges are granted only upon request, and only on stock merchandise within 90 days of date of invoice.

SHIPPING INFORMATION Orders will be shipped the most economical way or according to customers specifications.

F.O.B. All shipments are made F.O.B. Delavan, Wisconsin.

RECEIPT OF DAMAGED MERCHANDISE Continental Plastic's orders are filled with merchandise in good condition and carefully packed in our shipping department. Unfortunately, there are occasions when merchandise is damaged during shipment and arrives in unacceptable condition. In all such instances, the carrier is responsible for safe delivery of the merchandise and any claims for damages must be filed with the carrier. Please inspect all shipments as soon as they are received, and in case of loss or damage, notify the carrier at once and arrange to file a claim as soon as possible. Keep the container the merchandise was sent in, as it must be inspected by the carrier before settlement of any claim. ICC regulations state that all claims of shortage or breakage must be filed within 10 days after date of shipment or they will not be honored.

TERMS OF PAYMENT Cash, check, credit card (Visa, Master Card or American Express), or 'Net 30 Days' by special arrangement. If you wish to open an account with us, please send your name, address, phone and fax number along with three credit references (one being your bank) to our credit department. Upon approval we will place you on open account and bill accordingly. A late charge of 1½% per month on the unpaid balance can be charged on all accounts over 30 days past due. All accounts 60 days past due will not be shipped. Seller does not warrant or guarantee fitness for purpose, merchantability, conception, quality or productivity, and no other warranty, oral or written expressed or implied. The statements and procedures outlined are recommendations only, and are not to be understood as warranties. Seller shall, under no circumstances be liable for any special, indirect or consequential damages arising from the use of this product, whether based on negligence or any alleged warranty in an amount greater than the purchase price of the product in respect to which such claim is made.

PRICES ARE SUBJECT TO CHANGE WITHOUT NOTICE

KNOT-A-BOOT®

Over-the-shoe clear polyethylene plastic boot covers are easy to slip on or off. They can be worn with or without a handy tie feature. The boots should be worn once and discarded to prevent unwanted contamination from one facility to another. Alternative means of packaging and colors are available by special order, please inquire.

Packaged 50 or 100 boots per box, 10 boxes per case. See below for specifics.

CONCENTRATED EXTENDERS

ONE-STEP™ Extender: For bovine and caprine semen. ONE-STEP™ is a concentrated stock solution of distilled sterile water containing tris buffer, citric acid, fructose, and glycerol. Water and egg yolk must be added prior to the addition of semen. All contents combined will produce 1,000 ml of extender.

Sold individually, 20 per case

- B2-7400 ONE-STEP™ Extender

TWO-STEP™ Extender: A CSS approved extender for the two-step processing of bovine and caprine semen. There are two bottles of concentrated solution containing distilled sterile water, tris buffer, citric acid and fructose. One bottle also contains glycerol. Water and egg yolk must be added prior to the addition of semen. All contents combined produce 1,000 ml of extender. *Sold individually, 20 per case*

- B2-7500 TWO-STEP™ Extender - one antibiotic vial included

- B2-7505 Antibiotics Only - tylosin tartrate, gentamicin sulphate, lincomycin, and spectinomycin. When antibiotic is combined with neat semen and extender (One vial for the TWO-STEP™ or two vials for the ONE-STEP™ Extender), a CSS approved extender is produced.

BOVINE TRICHOMONIASIS KIT

Sterile kit for obtaining preputial samples from bulls. The kit can also be used to collect samples from the reproductive tract of females. *Individually wrapped in a poly bag and sterilized.*

- B8-6575 Trich kit complete with 28" (71.12 cm) collection catheter 0.196" (0.497 cm) O.D. and assembled with a 19" (48.26 cm) Tube Protector™
- B8-6675 Trich kit complete with 28" (71.12 cm) collection catheter 0.215" (0.546 cm) O.D. and assembled with a 19" (48.26 cm) Tube Protector™
- B8-6677 Rubber Bulb Only

TRICHIT™ TRICHOMONIASIS KIT

Developed by a veterinarian who specialized in bull health protocol, the TRICHIT™ to improve collection capabilities. A proprietary cap provides a more robust scraping surface compared to the traditional infusion tube method. Featuring a cross-drill hole under the cap, this unique design allows samples to be easily drawn into the tube as negative pressure is applied with the syringe.

The White Cap is more pliable than the Black version, creating a softer scraping surface.

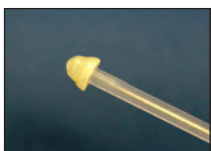

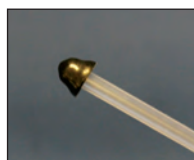

- B8-6725 Black Cap, Drilled 21" Tube B8-6735 Clear Cap, Drilled 21" Tube
- B8-6730 Black Cap, 21" Tube with Adapter B8-6740 Clear Cap, 21" Tube with Adapter

Bovine Trich Kit

SHEATH PROTECTOR™

Very popular for sanitary protection of the sheath during breeding. The tube and scored vinyl cap of the SHEATH PROTECTOR™ prevent the transfer of contaminants into the uterus during insemination or embryo transfer, as the sheath does not come in contact with any material outside of the animal. The flared end makes it easy to hold with one hand during insemination.

25 per poly bag, 40 bags per case, 48 cases per skid

B6-4700 12" (30.48 cm) Sheath Protector™

SHEATH PROTECTOR™
Pictured alone, and loaded

BREEDING SHEATHS

50 sheaths per bag, 20 bags per case = 1,000 sheaths per case, 96 cases per skid
Also available in Master Case quantities, 10 cases of 1,000 sheaths per Master Case*

TWIN-TAPERED™ INSERT SHEATH

PVC sheath designed with an insert provides a secure seat for the straw and can be used for both ½ ml and ¼ ml straws. Dimensions are 17½" (44.45 cm) long, 0.178" (0.452 cm) O.D.

The color of insert indicates which gun is to be used with which sheath for all sheath options:

- ALL Green insert sheaths have slit tubes — "O" Ring insemination guns
- ALL Blue insert sheaths have unslit tubes — Barb Style insemination gun

- B6-4405 Sheath with green insert, slit tube, regular position insert
- B6-4505 Sheath with blue insert, unslit tube, regular position insert

PUSHED INSERT SHEATHS

- B6-4420 Sheath with green insert, slit tube, insert pushed to coned end of sheath
- B6-4520 Sheath with blue insert, unslit tube, insert pushed to coned end of sheath

SEALED SHEATHS™

With a special seal on the open end of the sheath, the SEALED SHEATH™ has been shown to increase conception rates. The sealed end keeps contaminants out of the open end of the sheath so only genetic material is deposited in the uterus.

- B6-4230 Sealed Sheath™ with no insert, slit tube, for use with ½ ml straw only
- B6-4430 Sealed Sheath™ with green insert, slit tube
- B6-4530 Sealed Sheath™ with blue insert, unslit tube

SHEATH, ½ ML STYLE WITH SLIT - NO INSERT

Designed for use with the B6-3200 Insemination Gun and ½ ml wick and powder plug straws. This sheath has no insert, as it is for use only with a ½ ml straw. 17½" (44.45 cm) long and 0.167" (0.424 cm) O.D.

- B6-4205 No insert, slit tube
- B6-4230 No insert, slit tube, sealed end

SANI-PAK™ SHEATH

Sheaths are available individually wrapped in a soft plastic sleeve which can be used as a double walled insemination device to minimize intrauterine contamination.

- B6-4210 Individually wrapped B6-4205 ½ ml slit sheaths
- B6-4410 Individually wrapped B6-4405 slit sheaths, green insert
- B6-4510 Individually wrapped B6-4505 unslit sheaths, blue insert
- B6-4425 Individually wrapped B6-4420 Pushed Insert Sheath, green insert
- B6-4525 Individually wrapped B6-4520 Pushed Insert Sheath, blue insert

CONTINENTAL™ SHEATH

Flared end designed for user to easily hold in position on the gun during breeding. (Pictured on with CONTINENTAL™ Gun)

- B6-4105 For use with ½ ml straw only. To be used with CONTINENTAL™ Gun or plunger-wire only breeding - 80 packs per Master Case (4,000 total sheaths)*
- B6-4125 For use with ¼ ml straw only. For plunger-wire only breeding 80 packs per Master Case (4,000 total sheaths)*

ALL-2-MATE® INSEMINATION GUN

The most versatile insemination gun on the market today. No need to change ends or use adapters, this convenient gun will seat both ½ ml and ¼ ml straws with ease. A TWIN-TAPERED™ Insert Sheath should be used with this gun. 17.50" (44.45 cm) in length. Guns sold individually, packaged in protective plastic tube. Inquire about having your logo acid-engraved on the plunger button.

All CONTINENTAL™ guns come with the colored ID Rings, pictured at right.

B6-3260 "O" Ring Gun with colored ID ring - *use with a Green Insert Sheath*

B6-3460 Barb Style Gun with colored ID ring - *use with a Blue Insert Sheath*

B6-0325 ALL-2-MATE® plunger wire only (with CONTINENTAL™ logo)

Colored Identification Rings on ALL-2-MATE® Guns

NUMBERED PLUNGERS

Numbers 1-10 are available on the head of the ALL-2-MATE® plungers. Marked by an acid-engraving process, the numbers will never fade or rub off. Sold in sets of 1-5 and 6-10.

Aspirator Kit

TURKEY TUBE FILLERS

CONTINENTAL™ Sperm Fillers are recognized by professional poultry breeders as the finest, most reliable units available. The machines are wired for 110 volt 60 cycle current, but are available for 220 volt 50 cycle current upon request.

MULTI SHOT™ AND SINGLE SHOT™ FILLERS

Variable speed machine which delivers tubes on a continuous basis at a speed determined by the operator (up to 1,500 per hour). The maximum dose is 1/15 ml with the 6 ml syringe, or 1/10 ml with a 12 ml syringe. The cabinet air is filtered, heated, circulated and thermostatically controlled. Tubes are preheated by the cabinet air and maintained at the ideal temperature for sperm cell viability. The hopper holds in excess of 1,500 insemination tubes. Preheated tubes are automatically fed through the machine, counted, indexed, filled and released to receiving tray.

P4-7700 MULTI SHOT™ Filler

P4-7600 SINGLE SHOT™ Filler — The SINGLE SHOT™ is an intermittent feed, single speed unit. The machine will fill one tube and stop, waiting until the tube is removed before filling the next tube. All other features are the same as P4-7700, MULTI SHOT™ Filler.

PNEUMATIC SEMEN DISPENSER

The pneumatic semen dispenser is air actuated and can be completely submerged in water for cleaning. Fills up to 1,600 tubes per hour, and weighs only 31 lbs. Requires a small compressor or portable air tank. (Not included with dispenser) Features the CONTINENTAL™ time-tested feed screw assembly which offers greater accuracy and less maintenance. The maximum dose is 1/15 ml with the 6 ml syringe, or 1/10 ml with a 12 ml syringe.

P4-7800 Pneumatic Semen Dispenser

CONTINENTAL™ MINI STRAW FILLER

The Mini Straw Filler is Continental's newest addition to its exceptional line of filling machines. The Mini has a sturdy fiberglass outer case that features a rugged design and is easy to clean. The head detaches from the base and is completely submersible for complete sanitation.

P4-7900 Mini Straw Filler, includes mini straw shooter

P4-7910 Additional tubing for Mini Straw Filler, sold in packs of 50 tubes

SHOOTERS

P6-7260 Shooter for Mini Straw, *pictured with Mini Straw Filler*

P6-7250 Shooter for Standard OD Styrene Tube, 5mm, 0.075"

P6-7255 Shooter for Small OD Styrene Tube, 4mm, 0.082"

EXPELLER

This hand operated device releases a "puff" of air when the rubber bulb is squeezed, expelling semen from the tube. The palm held device allows the insemination technician to have control of the air pressure during insemination.

P6-7200 For Use with Standard O.D. Tube

P6-7202 Hand expeller for Small O.D. Tube

ASPIRATORS

Collect, aspirate and extend directly into a syringe. When filled, load the syringe directly into the semen filler or hold until ready to inseminate. It is convenient and totally disposable. Kits individually packaged and sterilized.

P2-7100 12 ml aspirator kit

P2-7104 Rubber stopper - 12 ml, 50 per bag

P2-7101 6 ml aspirator kit

P2-7102 Rubber stopper - 6 ml, 100 per poly bag

P2-7000 Long bent aspirator tube, 90° bend, 5" (12.70 cm), 100 per poly bag

P2-7010 Short bent aspirator tube, U-shaped bend, 4" (10.16 cm), 100 per poly bag

P2-7020 Set of bent aspirator tubes (One of each, P2-7000 and P2-7010)

POULTRY SEMEN EXTENDER

The Beltsville Poultry Semen Extender II, containing gentamicin, maintains acceptable fertility of the sperm for up to six hours when used as directed. The temperature of the extender should be at 68°F to 77°F (20°C to 25°C) before being mixed with the semen. Recommended extension is 1 to 1.

TURKEY EXTENDER

Nalgene bottles: sold individually

P2-7450 50 ml bottle, 50 per case

P2-7520 125 ml bottle, 25 per case

Glass Ampoules: 100 per box, 8 boxes per case

DUCK EXTENDER

12-16 weeks lead time for duck extender.

Glass ampoules: 100 per box, 8 boxes per case

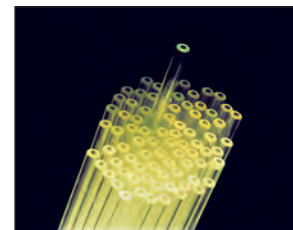

P2-7250 2.5 ml ampoule

POULTRY TUBES — STANDARD O.D.

Polished styrene tubes 4 1/16" (10.3 cm) in length with outside diameter of 0.196" (5 mm). The tubes are available with a 0.075" (0.190 cm) or 0.082" (0.208 cm) inside diameter. 100 tubes per poly bag, 10,000 per case, 500,000 per skid

P6-5575 0.075" (0.190 cm) inside diameter, min. order quantity of 10 pks (1,000 tubes)

P6-5582 0.082" (0.208 cm) inside diameter, min. order quantity of 10 pks (1,000 tubes)

Poultry Tubes

POULTRY TUBES — SMALL O.D.

Same length and bore diameter as Standard O.D. Poultry Tubes except the outside diameter is reduced to 0.160" (4mm) or an outside reduction of 18.3%. Reduced shelf space and freight costs. 100 tubes per poly bag, 10,000 per case, 480,000 per skid

P6-6075 0.075" (0.190 cm) inside diameter, min. order quantity of 10 pks (1,000 tubes)

P6-6082 0.082" (0.208 cm) inside diameter, min. order quantity of 10 pks (1,000 tubes)

MINI POULTRY STRAWS

New and improved disposable mini straw for insemination. Manufactured of high quality light blue plastic providing a thin wall and flexible transparent tube. Both tube ends are turned in and smooth to minimize injury and any loss of semen during handling. Straw is 2.75" (7.0 cm) long with an O.D. of 0.112" (0.284 cm) and an I.D. of 0.098" (0.248 cm). Economical shipping costs. 1,000 per poly bag, 100,000 per case, 2,200,000 per skid

NEXT GENERATION® UNIVERSAL STALLION SEMEN EXTENDER

The dual sugar and non-fat dry milk component of NEXT GENERATION® universal stallion semen extender is recommended for all A.I. purposes. Semen may be cooled for extended storage periods for transport. It may also be used the same day on the farm with or without antibiotics. Each kit contains the component parts to make 150 ml of extender. Bottle includes special anti-leak foil seal. *Sold in units of 10*

NO ANTIBIOTIC: E6-7020 150 ml dose - Includes water and dry components pouch
AMIKACIN AND K-PENN: E6-7022 150 ml dose - Includes water and dry components pouch

DR. KENNEY STALLION SEMEN EXTENDER

NO ANTIBIOTIC: E6-7200 150 ml dose - Includes water and dry components pouch
AMIKACIN AND K-PENN: E6-7222 150 ml dose - Includes water and dry components pouch

EQUINE EXPRESS II™ SHIPPING CONTAINER

A "User Friendly & Ready to Use" cooled stallion semen shipper. Enclosed in a tough shipping box is a compartmentalized Styrofoam container for up to 120 ml of extended semen and coolant brick. USDA-APHIS approved disposable container for international shipping. No container tracking or deposits needed. Value added shipping rates with Federal Express and UPS. *Sold individually, 6 units per case*

E8-9000 Two sterile, all-plastic 50 ml syringes and coolant brick included

CULTURE SWAB

A unique tool for collecting uterine samples from brood mares for culture.

The three-piece design includes:

- 1) an outer clear PVC tube
- 2) a blue PVC swab sheath inside outer tube
- 3) a white PVC swab holder with attached polystyrene cotton swab.

Fully assembled the length is 29½" (74.93 cm), the O.D. is 0.30" (0.762 cm). This combination permits the retrieval of samples in a simple and sanitary manner. After retrieval, the samples can be stored and transported safely in its own protective capsule. Patent #4,586,604. Other patents pending.

E9-5200 Sterile, individually wrapped, 25 per poly bag, 10 bags per case

E9-5215 Non-sterile, 25 per poly bag, 20 bags per case

EQUINE INFUSETTE® PIPETTE

These pipettes are specifically designed for use with many of the common uterine infusion products. Includes blue adapter. Manufactured of PVC with a 0.130" (0.330 cm) I.D., 0.196" (0.497 cm) O.D. *25 per poly bag, 40 bags per case*

E6-5310 Non-sterile 22" (55.88 cm) long

E6-5315 Sterile 22" (55.88 cm) long, individually wrapped

E6-5410 Non-sterile 25" (63.50 cm) long

E6-5415 Sterile 25" (63.50 cm) long, individually wrapped

STALLION A.V. LINERS — DISPOSABLE

Manufactured of high quality, soft blue polyethylene.

E8-7000 Missouri-type liner, 1¼ mil, 36" (91.44 cm) long
100 per zip lock bag, 10 bags per case

E8-8050 Colorado-type liner, extra long, 1½ - 2 mil, 37½" long
50 per zip lock bag, 10 bags per case

ALL-2-MATE® GOAT INSEMINATION GUN

The most versatile insemination gun on the market today. No need to change ends or use adapters, this convenient gun will seat both ½ ml and ¼ ml straws with ease. For use with the G6-4200 or G6-4400 sheath.

G6-3250 ALL-2-MATE® Goat Insemination Gun, 12" (30.48 cm) long

ALL-2-MATE®
Goat Insemination Gun

GOAT SHEATH WITHOUT INSERT

PVC sheath without an insert for use with the ALL-2-MATE® goat insemination gun G6-3250 and ½ ml wick and powder plug straw. Dimensions are 12 1/8" (30.79 cm) long, 0.167" (0.424 cm) O.D. 25 per poly bag, 80 bags per case

G6-4200 ½ ml Goat Sheath with Slit

GOAT SHEATH WITH INSERT

PVC sheath with an insert for use with the ALL-2-MATE® goat insemination gun G6-3250 and ½ ml or ¼ ml wick and powder plug straw.

G6-4400 Twin-Tapered™ Insert Goat Sheath

Insert Sheaths

CONTINENTAL™ GOAT SHEATH

PVC sheath designed for use with the Continental™ insemination gun G6-3100. It will accommodate ½ ml wick and powder plug straws. Dimensions are 12 3/8" (30.79 cm) long and 0.187" (0.474 cm) O.D. 25 per poly bag, 80 bags per case

G6-4100 CONTINENTAL™ Goat Sheath

CONTINENTAL™ GOAT INSEMINATION GUN

A stainless steel gun to be used with the Continental™ goat sheath G6-4100. Dimensions are 12 ¼" (31.11 cm) long, 0.126" (0.320 cm) O.D.

Dispensing Bottle

CONTINENTAL™
Liquid Lube

Tube Holder

SHEATH HOLDER

Lightweight aluminum carriers are designed to store open packages of breeding sheaths/tubes. They are sealed tightly on each end with removable plastic slipover caps to prevent contamination. Holds 50 sheaths.

Sold individually, includes caps

B6-6100 Sheath Holder, 18" (45.72 cm) long, 1¾" (4.45 cm) diameter
Fits Professional Kits

TUBE HOLDER

Lightweight aluminum carriers are designed to store open packages of tubes. They are sealed tightly on each end with removable plastic slipover caps to prevent contamination.

Sold individually, includes caps

B6-6125 Tube Holder, 25" (63.50 cm) long, and 2" (5.08 cm) in diameter

½ ml Tweezers

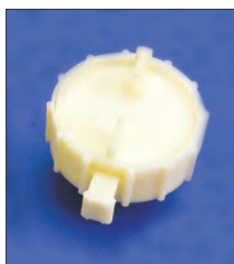

STRAW TWEEZERS

A specifically designed 6½" (16.51 cm) long polyester tweezers for quick and easy removal of straws and goblets from canisters. They are shaped with a specially grooved tip that grips and surrounds the straw, yet does not crush it. They protect your hands during semen handling as plastic transmits very little heat or cold.

Sold individually, 25 per zip lock pack

B6-6408 ½ ml straw tweezers

B6-6410 ¼ ml straw tweezers

Straw Cutter

CITO STRAW CUTTER

The Cito straw cutter is designed to quickly cut off the sealed end of straws. After insertion of straw, a push of a button cuts the straw at the proper length. Disassembles for cleaning and disinfection. Made of non-corrosive plastic with a stainless steel blade and is 2¼" (5.72 cm) in diameter.

Sold individually, 25 per zip lock pack

B6-6404 Individually wrapped

Kits can be custom-packed to your specifications upon your request.

PROFESSIONAL KITS

Durable 24 gauge polished stainless steel case, full length piano stop hinge, heavyweight sturdy latch, and a top carrying plastic coated handle. The case is 18½" (46.99 cm) long, 8" (20.32 cm) wide, 8¾" (22.22 cm) deep. Features a retaining ring to accommodate THERMOS® bottles detailed in this catalog, a bracket on the opposite side is available to secure two 8oz bottles, and a cradle in front is designed to hold a sheath holder.

Sold individually

B1-1030 Professional Breeding Kit - Empty

Professional Breeding Kit

CITO ARTIFICIAL INSEMINATION KIT BOX

The Cito AI Box is ruggedly designed to withstand years of usage. Ideal for the sanitary storage of sheaths, insemination guns, thaw units and necessary tools for artificial insemination. Includes a Cito Straw Cutter and a pair of ½ ml tweezers.

Sold individually

B1-1050 Cito Insemination Box

Cito A.I. Kit Box

WALL DESK

Sturdy wall desk is 14½" (36.83 cm) long, 2" (5.08 cm) wide, 19¼" (48.90 cm) deep. It is equipped with two pocket shelves to hold records. A sturdy chain holds desk in the writing position.

Sold individually, 5 per case

S6-6560 Pocket Filters

S6-6529 Non-Woven Round
Collection Filters

NON-WOVEN COLLECTION FILTERS

Non-spermicidal, fast-flow filter with excellent gel retention. Each batch tested and verified non-spermicidal. *200 per package, 2,000/cs*

- S6-6529 Ultra Flow Semen Filters - 9"

RUBBER BANDS

These #32 rubber bands are the ideal size to use with our collection vessels to hold the collection bag and filter in place.

Each 1lb. bag contains 900-1000 rubber bands.

- S3-0050 #32 Rubber Bands 1lb. bag

PRE-COLLECTION GLOVES WRIST OR ELBOW LENGTH

Pre-collection gloves are ideal for boar preparation, cleaning and evacuation of the prepuce prior to collection. These gloves easily slip over our CONTINENTAL™ Textured Vinyl Collection Gloves and can be removed quickly and easily to expose the clean collection glove beneath in time for collection. This helps to maintain good hygiene and reduce risk of contamination. Made of 1 ¼ mil thickness polyethylene. Elbow length gloves are 20" (50.80 cm) long. *Packaged 100 gloves per box, 10 boxes per case, 64 cases per skid.*

All polyethylene pre-collection gloves are non-spermicidal, smooth and powder free

CASA SYSTEM

The CASA system provides accurate analysis of concentration, motility, progressive motility, morphology and many other semen-quality parameters. The user can choose to process doses using total cells, motile cells, progressively motile cells, morphologically normal cells or any combination of those parameters. This removes the traditional subjective analysis of the technician and creates more accurate, uniform semen doses. Analysis is fast and easy to perform. The system can be used for multiple species. Call for details.

CELLVISION® SLIDES

These four-chamber, 20 micron CellVision® slides are the ideal choice for any CASA system. Our automated and patented production process ensures accurate and reproducible chamber-depths. Every slide on the production line is checked with a laser interferometer. Slides are specially coated to improve motility as compared to competitive slides. Each lot tested and verified non-toxic. Available in both vertical and horizontal configurations.

S6-1603 CellVision® H 4-chamber, horizontal 

S6-1606 CellVision® V 4-chamber, vertical 

MICROSCOPE STAGE WARMER

Ideal for checking semen motility, this stage warmer is sized specifically for the user's stage warming needs and is adaptable to all brands of biological compound and stereo microscopes. The stage warming deck is made from high tensile aluminum which maintains a constant temperature of $\pm 1^{\circ}\text{C}$ between a setting range of 20°C to 50°C . Pre-heating the stage takes 1 to 2 minutes to reach the constant temperature desired.

S3-1140 Microscope Stage Warmer

Microscope Stage Warmer

STEP UP™ SLIDE WARMER

The STEP UP™ Slide Warmer's unique patent pending design helps you save space while still meeting a busy lab's needs. The STEP UP™ holds twice as many slides as a flat unit of the same size and also makes retrieving your slides easier since the end of the slide is not on the flat surface. Capacity of 40 slides.

S3-1160 STEP UP™ Slide Warmer

Step Up Slide Warmer

Flat Slide Warmer

FLAT SLIDE WARMERS

These slide warmer are perfect for the semen lab. They have a capacity of 23 or 66 slides, have an LED temperature display, are adjustable from room temperature to 70°C and provide uniform heat across the entire heating surface. Available in 220V upon request.

S3-1150 Large Slide Warmer, $25'' \times 8''$, (64cm x 20cm), capacity 66 slides

S3-1155 Small Slide Warmer, $10 \frac{1}{4}'' \times 7''$, (26cm x 18cm), capacity 23 slides

We offer three standard models of microscopes to fit your needs whether you are checking semen on-farm, analyzing semen for processing in the lab, or performing quality-control checks on processed doses. We can also customize a microscope to fit your exact needs. Please contact your CPC representative to discuss your needs.

COMPLETE SEMEN EVALUATION HEATED-STAGE MICROSCOPE

This is an excellent choice for the professional semen laboratory. It comes standard with full phase-contrast, a binocular head and heated stage as well as the following features and options:

- Complete Semen Evaluation System
- Binocular or Video-Ready Head
- Choice of Achromat, Semi-Plan or Plan objectives
- Digital temperature Controller
- Digital USB or S-Video Camera options
- Temperature Range 25-50°C (77-122°F)
- Brightfield or full Phase options
- Halogen or LED illumination
- Koehler field diaphragm for illumination control

S3-1130 Complete Semen Evaluation Heated-Stage Microscope

BINOCULAR PHASE-CONTRAST MICROSCOPE

Ideally suited for motility and morphology analysis in the AI laboratory.

- 30 degree, inclined, binocular Seidentopf head which rotates 360 degrees
- 10X widefield eyepieces which are interpupillary adjustable from 55-75mm
- 10XR, 20XR, 40XR, and 100XR phase-contrast objectives and a single turret condenser
- Includes a green filter and a centering telescope eyepiece

S3-1125 Binocular Phase-Contrast Microscope

MONOCULAR MICROSCOPE

Ideal for the on-farm user to check the motility of semen prior to use. It has the following features:

- Magnifications: 40X to 1000X
- Abbe condenser NA 1.25
- Coaxial coarse and fine focusing
- Iris diaphragm with filter holder including blue filter
- UL approved 3 wire cord
- CE certified
- Immersion oil, vinyl dust cover, rubber eyeguards
- 4 DIN objectives: 4X (N.A. 0.10), 10X (N.A. 0.25), 40X (N.A. 0.65), 100X (oil immersion, N.A. 1.25)
- 4½" x 5" (120x125mm) Mechanical state with coaxial drive/rack and pinion adjustment, low knob position

S3-1120 Monocular Microscope

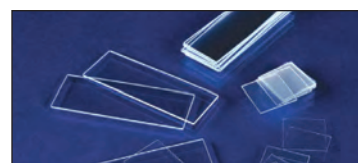

Monocular Microscope

MICROSCOPE SLIDES & COVER SLIPS

Quality slides and cover slips for semen evaluation.

- S6-9000 Microscope Slides – 72/box
- S6-9003 Microscope Slides – caffeine coated – 72/box
- S6-9002 Cover Slips 18mm x 18mm – 100/box

Slides and Cover Slips

Spectrophotometer

SPECTROPHOTOMETERS

The spectrophotometer is a cost-effective option for measuring sperm-cell concentration. Either 10mm square cuvettes or 12mm clear glass tubes can be utilized.

S2-7000 Spectrophotometer

CUVETTES TUBES

For use in spectrophotometers.

S3-0030 Square cuvettes – 2.5ml to 4.5ml – 500/case

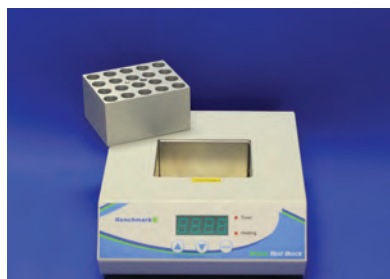

S3-0035 Square cuvettes – 1.5ml to 3.0ml – 500/case

S3-1360 Glass Tubes – 12mm x 75mm – 250/bx 1,000/case

HEMOCYTOMETER SLIDE

For manual counting of sperm cells. This improved Neubauer hemocytometer features 0.100mm cell depth, 0.1 microliter volume and 1/400 square mm grid.

S6-1601 Improved Neubauer Hemocytometer

Digital Dry Bath Block Warmer

DIGITAL DRY-BATH BLOCK WARMER

This single-block warmer is perfect for warming samples for evaluation. Microprocessor controlled, accurate and easily-programmable, no semen lab should be without one. A variety of interchangeable blocks are available to accommodate various sample tube sizes.

S3-1340 Digital Dry Bath Block Warmer

	Warming Block Options		
	20-space	12-space	6-space
Tube sizes			
10mm	S3-1328

13mm	S3-1332		
15mm		S3-1322	
16mm		S3-1324	
17mm		S3-1326	
20mm			S3-1318
25mm			S3-1320

REPEATABLE DISPENSING PIPETTE

Fill the Combitip and accurately dispense extender or other diluents multiple times without the need to refill. This pipette has a digital display, is adjustable from 1µl – 10ml and can utilize up to 9 different Combitips. Ask a CPC representative for a Combitip to meet your specific requirements.

S3-1235	Eppendorf Repeater Plus Pipette
S3-1225	Eppendorf Combitip Plus 25ml – 100/cs
S3-1230	Eppendorf Combitip Plus 50ml – 100/cs

FIXED & ADJUSTABLE PIPETTES

For use with CASA, Spectrophotometers and other laboratory procedures.

Pipette - Fixed Volume	
S3-1240	25µl
S3-1243	50µl
S3-1245	100µl
S3-1248	200µl
S3-1250	500µl
S3-1252	1000µl

Pipette - Adjustable Volume	
S3-1255	20µl - 200µl

S3-1255 Adjustable Volume

DISPOSABLE PIPETTE TIPS

	Color	Volume	Packaging
S3-1260	Clear	10µl	1,000/pk
S3-1265	Yellow	200µl	1,000/pk
S3-1270	Blue	1000µl	100/box, 10 boxes/case

PIPETTE STATION

The pipette station will hold up to five pipettes keeping them upright and off the counter top. Works with most standard pipettes.

S3-1220 Universal Pipette Station

SEMEN SAMPLE TUBES & CAPS PLASTIC TUBES

S3-1300 5ml Sample Tubes, 12mm x 75mm – Clear, 1,000/cs

S3-1305 8ml Sample Tubes, 13mm x 100mm – Clear, 1,000/cs

Slides and Cover Slips

MICROSCOPE SLIDES

Clear. Size 3" (7.62 cm) long x 1" (2.54 cm) wide x 1.0-1.2 mm thick.
72 per box, 50 boxes per case

S6-9000 Microscope Slides

COVER GLASSES

Ideal microscope cover glasses (18 mm x 18 mm) for use in laboratories where the best technical quality possible is desired at budget prices.

Excellent for routine microscopy.

100 cover glasses per box

S6-9002 Cover Glasses

Semen Sampling Straw
Disposable Transfer Pipette

SEMEN SAMPLING TOOLS

S6-1100 Disposable Plastic Transfer Pipettes 9", with bulb, 500 per box

S6-1600 Sodium Citrate 500 g, 6 bottles per case * not pictured

B4-2222 Semen Sampling Straw, ½ ml, 1,000 per poly bag, 10 bags per case

B2-6600 Centrifuge Tube, 15 ml, disposable, 100 per box * not pictured

SLIP 'N SNIP™ SCISSORS

Handy folding scissors ideal for cutting the sealed end of straws. The blades are made of surgical stainless steel to retain sharpness. Its size makes the scissors convenient for carrying in a pocket or A.I. kit. Pull handles apart and fold scissors into cutting position; to close, use reverse procedure. Dimensions are 4½" (11.43 cm) in length when open, 4 1/8" (10.47 cm) in length when closed.

B6-6406 SLIP 'N SNIP™ Scissors, Sold individually, 25 per master bag

Slip 'n Snip Scissors™

SYRINGES

The disposable plastic syringe is available in 6 ml or 12 ml sizes to be used with the Continental® Sperm Fillers. Rubber Grommet for use with Tube Filling Machines.

P6-6606 6 ml syringe, Non Sterile, 100 per pack, 5 packs per case

P6-6612 12 ml syringe, Non Sterile, 100 per pack, 5 packs per case

P6-6600 End caps for syringes, Non Sterile, 100 per poly bag

P6-7666 Rubber Grommet, Sold Individually

Syringes, Grommets and End Caps

THERMOMETERS

S3-1105 Digital Thermometer w/ Stainless Steel Probe – Long Stem

S3-1100 Glass Thermometer – Non-Mercury – Centigrade and Fahrenheit - 12" length

ELECTRONIC PRECISION BALANCE

This 10kg precision balance is suitable for labs that need to weigh large quantities precisely.

S2-5400 10kg Precision Balance – 0.1g increments

10kg Precision Balance
0.1g increments

ELECTRONIC COMPACT SCALES

These scales are perfect for most laboratory uses. They operate in 1g increments using 6 AA batteries or the provided AC adapter. These scales' features include, auto backlit display, large 7.0" x 6.2" stainless steel platform, four weight modes (grams, ounces, pounds, kilogram) and TARE key to zero out a container. They have a plastic cover which prevents damage from spills and makes for easy clean-up.

S2-5500 10kg Electronic Scale – 1.0g increments

S2-5000 6kg Electronic Scale – 1.0g increments

10kg Electronic Scale
1.0g increments

HANDHELD SPATULA SCALE

Useful for weighing extender powder when mixing. Features a 300g capacity with 0.1g increments. The detachable scoop is dishwasher safe.

S2-2500 Spatula Scale – 0.1g increments

Spatula Scale

VAT SCALE

This 400lb. (180kg) vat scale has a remote display with backlit for easy viewing. The 5 button keypad on the remote indicator includes On/Off, Hold, Unit, Zero and Tare buttons. It features a 14" x 16" stainless steel platform and weighs in 0.1lb. (.050kg) increments.

S2-5600 Digital Vat Scale – 180kg – 50g increments

We have many more options for digital scales of different capacities, dimensions and weight increments. Possible uses: Vat scales, weighing bulk ingredients, precision scales for measuring micro-ingredients, package weighing for shipping, and many more. Contact a CPC representative with your specific needs.

Vat Scale

CALIBRATION WEIGHTS

To ensure accurate weights and processing, digital scales should be regularly calibrated. These steel calibration weights are adjusted to ASTM Class 6 tolerance for general purpose applications. They are suitable for scale calibration in most AI laboratories. We do not recommend these weights for testing and calibration services requiring paperwork documentation to meet ISO requirements. Contact us if you need calibration weights for ISO certification.

Calibration Weights	
S2-1000	1kg
S2-1010	2kg
S2-1020	5kg
S2-1030	100g
S2-1040	200g
S2-1050	500g

Calibration Weight

FertiLife™ boar semen extender is the first of a new generation of extenders that was developed by evaluating the fertilization potential of individual sperm cells. Research has shown that even cells with excellent motility may not be capable of fertilizing eggs.

A new technique has been developed that allows individual sperm cells to be monitored in the lab while stored in different extenders and their ability to be capacitated and fertilize eggs is quantitatively assessed. Sperm cells stored in FertiLife™ exceed the capacitation ability of cells stored in all other extenders.

More importantly, the higher capacitation rates of cells in FertiLife™ extender translate into higher conceptions rates and increased litter sizes. This has been confirmed using on-farm data.

With higher fertilization capacity, FertiLife™ extender may allow users to decrease the number of cells per dose required for insemination. FertiLife™ extender contains no animal products or BSA; it is non-irritating and non-foaming.

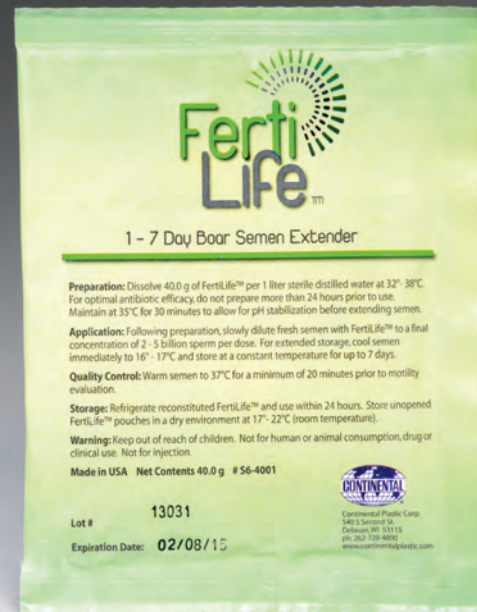

CONTINENTAL™ products distinguish themselves from other providers of extenders for insemination because of their focus of fertilizing potential of individual sperm cells in addition to the traditional monitors of cell motility and morphology.

THE IMPORTANCE OF CAPACITATION

“higher capacitation rates of cells extended with FertiLife™ translate into higher conceptions rates and increased litter sizes”

FERTILE STORAGE LIFE

The number of days post-collection that we would expect fertility results from normal ejaculates comparable to the day of collection using current industry standards for water quality, collection procedure, hygiene, sperm cell count and other parameters.

FERTILIFE™

Long-Term Preservation: Fertile Storage Life 7-8 Days

Maximum fertile storage life with enhanced capacitation and advanced temperature-shock protection. Ideal for a twice-per-week collection/delivery schedule. Contains Gentamycin, Ampicillin and Polymyxin E.

Custom antibiotics available.

- S6-4001 FertiLife™ Boar Semen Extender – 40g (1 Liter)
- S6-4003 FertiLife™ Boar Semen Extender – 120g (3 Liter)
- S6-4100 FertiLife™ Boar Semen Extender – 4kg (100 Liter)

CPC BTS

Short-Term Preservation: Fertile Storage Life 2-3 Days

The proven standard BTS formulation for production systems using semen within 2-3 days of collection. Our 40g per liter formulation makes it easy to avoid confusion and mixing errors in the lab when switching from our long-term formula. Contains Gentamycin.

- S6-2001 BTS Boar Semen Extender – 40g (1 Liter)
- S6-2003 BTS Boar Semen Extender – 120g (3 Liter)
- S6-2100 BTS Boar Semen Extender – 4kg (100 Liter)

FERTILIFE™ QUICKVIEW

Long-Term Preservation: Fertile Storage Life 6-7 Days

Designed for those production systems where quick analysis of the extended semen sample with minimal warming is preferred. Still offers good fertile storage life with enhanced capacitation and advanced temperature-shock protection.

Ideal for a collection/delivery schedule of 2-3 times per week.

Contains Gentamycin, Ampicillin and Polymyxin E.

Custom antibiotics available.

- S6-3001 FertiLife™ QuickView Boar Semen Extender – 40g (1 Liter)
- S6-3003 FertiLife™ QuickView Boar Semen Extender – 120g (3 Liter)
- S6-3100 FertiLife™ QuickView Boar Semen Extender – 4kg (100 Liter)

Mixing Vat with Accessories

Mixing Agitator

pH and Water Quality Meters

EXTENDER MIXING VATS

- 100% Stainless Steel construction for durability and long life
- Double-wall fluid jacket design for even heat distribution
- Easy to clean, smooth weld design
- Available with 120V or 240V heating element
- Available in three sizes: 20L, 60L and 120L

S3-3010 Extender Mixing Vat - 20L capacity

S3-3015 Extender Mixing Vat - 60L capacity

S3-3020 Extender Mixing Vat - 120L capacity

DIGITAL TEMPERATURE CONTROLLER

S3-3100 Digital Vat Controller - does not include heating element

S3-3105 Digital Vat Controller - 120V - 20L vat

S3-3110 Digital Vat Controller - 120V - 60L vat

S3-3115 Digital Vat Controller - 120V - 120L vat

S3-3120 Digital Vat Controller - 240V - 120L vat

MIXING AGITATOR

S3-3205 Mixing Agitator Assembly for 20L Vat

S3-3210 Mixing Agitator Assembly for 60L and 120L Vats

PORTABLE VAT SCALES

S2-5600 Portable Vat Scale 200Kg capacity - 50g increments
20L, 60L and 120L Vats

STAINLESS STEEL WATER BATHS

Contains built-in heater & circulators for sample analysis in the lab.

S3-3305 Circulating Water Bath - 6 liters -13.3 x 13.3 x 14 cm

S3-3310 Circulating Water Bath - 13 liter - 13.3 x 21.6 x 19.7 cm

S3-3315 Circulating Water Bath - 28 liter - 55.8 x 33.5 x 37.5 cm

PH METERS & WATER QUALITY METERS

For testing water quality and mixed extender. Use EC (electrical conductivity) to test water quality. Use TDS (total dissolved solids) and pH to ensure extender was mixed properly and is ready for use.

S3-1700 Waterproof digital pH meter with thermometer

S3-1705 Waterproof combo meter, EC/TDS/Temp, with NaCl, 442 & KCl conversion factors

AUTOMATED TUBE PACKAGING SYSTEM

An all-new, fast, efficient, reliable, fully-automatic semen packaging machine designed exclusively for Continental Plastic. Utilizing our patented Eco-Tip semen tubes, or the Ultra-Thin twist-off tubes, this machine offers the following features:

- Electric Operation - NO AIR COMPRESSOR REQUIRED
- Economically Priced
- Touch Screen Control System
- Operating speed of around 600 doses per hour
- Bar Code Capable
- Available with "Print-On" technology or with labels

S7-8000 Automated Tube Packaging System

Magnetic Impulse Sealer

MAGNETIC IMPULSE SEALER

This magnetic heat impulse sealer can seal 6 tubes simultaneously.

Tubes are held in a stainless steel rack.

Does not require an air compressor for use.

S6-8264 Magnetic Tube Sealer (1 tube rack included)

S6-8236 Semen Tube Rack, holds 6 tubes

Semen Tube Rack

MANUAL TUBE FILLING SYSTEM

For dispensing extended semen into bottles or tubes. Ideal for dispensing pooled semen. Use with disposable gallon dispensing bag and spout.

Complete Manual
Tube Filling System

- | | |
|---------|---|
| S6-6545 | Complete system, includes all metal parts seen in picture on the left |

ECO-TIP™ BREEDER BAG™

ECO-TIP™ BREEDER BAG™

Featuring our patented ECO-TIP™ design, the CONTINENTAL™ ECO-TIP™ BREEDER BAG™ is the right choice for those systems which prefer bag packaging. Compatible with most existing bag-packaging systems, the ECO-TIP™ BREEDER BAG™ has a long, tapered spout which seats tightly in most standard catheters. The twist-off tip can also be reattached if a sample has been taken from the bag for analysis.

750 per roll, 2 rolls per case, 30 cases per skid.

S6-8500 - ECO-TIP™ BREEDER BAG™ - non-perforated

ULTRA-TWIST™ SEMEN TUBES

Designed to work with all current automated systems on the market, the ULTRA-TWIST™ Semen Tube's gradually tapered spout will fit snugly into all catheters available today. Tips effortlessly twist off for ease of use.

Graduated at 80 and 90 ml. 2,000 tubes per case, 22 cases per skid.

with Spout Cutter

BOTTLES - STANDARD OPENING

Sold as a complete set - soft polyethylene bottle with a twist-on spout, 100 ml.

S6-6584 Bottle and spout, 10/pk, 50 pk/case

USB DIRECT READ TEMPERATURE RECORDER

With a measurement range of -35 to +80°C (-31 to +176°F). The EL-USB-1 data logger can store over 16,000 readings and is supplied with a long-life replaceable lithium battery, allowing the unit to log data continually for at least one year. Data logger configuration software is supplied for easy set-up. Selectable parameters include logging rate, measurement units, high & low alarms and start-time.

S3-1710 Temperature Logger with USB interface and software

USB Temperature Recorder

DELIVERY & TRANSPORT BAGS

These write-on bags (write-on pen required, listed below) are designed for packaging and transporting semen doses. Dark color blocks UV light and protects semen against sun damage. Black bags, 4 mil thickness.

S6-6621 5 Liter, 12"W x 20"L (30.48 cm x 50.80 cm), 300 per case

S6-6623 9 Liter, 16"W x 20"L (40.64 cm x 50.80 cm), 300 per case

S6-6622 13 Liter, 23"W x 20"L (58.42 cm x 50.80 cm), 300 per case

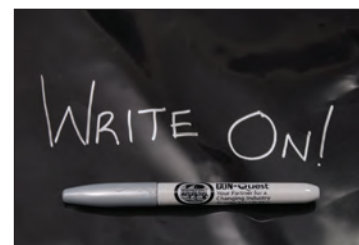

Transport Bags

WRITE-ON™ PEN - SILVER SHARPIE MARKER

Never lose track of delivery information! Write customer information and doses directly onto your black transport bags.

Silver Marker

THERMO-SPERM C21™

The pack that heats and cools - Thermo-SpermC21™ is no ordinary gel pack and revolutionizes the way semen is shipped. The chemical compound in Thermo-SpermC21™ is temperature sensitive and reacts to changes in temperature to maintain an optimal range during shipment. The chemical properties of Thermo-SpermC21™ allow temperature to be regulated during transit. Temperature regulation occurs through chemical reactions that produce heat and cold which maintains an acceptable temperature range for extended semen.

S6-0100 Thermo SpermC21™ Heating and Cooling Packs -100/case

Thermo-Sperm C21™

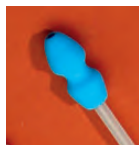

CATHETERS

Engineered for functionality and performance, our insemination catheters offer a wide range of options. All of our catheters have a standard length of 22 inches and are manufactured to precise internal and external dimensions to ensure a good fit with nearly all semen packages.

FOAM CATHETERS

The soft foam facilitates entering the reproductive tract with minimum risk of entering the urethra. Soft foam provides for an excellent lock in the cervix. The shaft is recessed to protect mucous membranes. *25 catheters per pack, 500 catheters per case, 35 cases per skid.*

The "CLASSIC" CONTINENTAL™ Design! Eliminate the need to buy a separate 'gilt catheter'. The more slender foam shape is suitable for breeding gilts as well as sows.

Classic

Complete

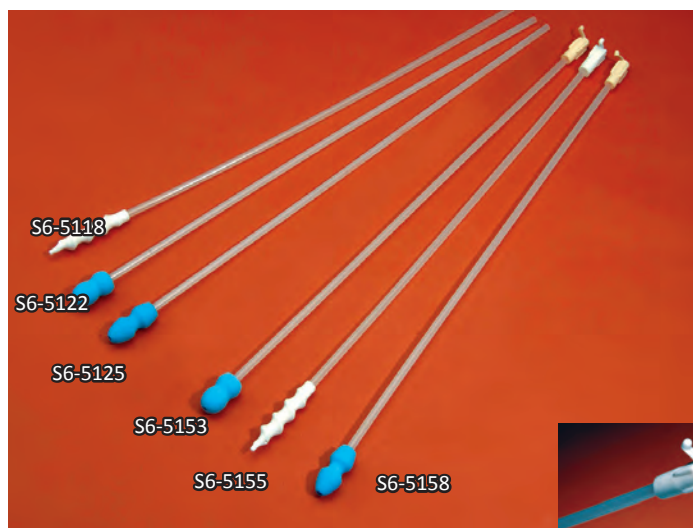

S6-5125 CLASSIC BLUE™

S6-5158 CLASSIC BLUE™ with attached handle

COMPLETE BLUE™ - A conventional foam shape which is suitable for all breeding females.

S6-5122 COMPLETE BLUE™

S6-5153 COMPLETE BLUE™ with attached handle

SPIRAL CATHETERS

A molded Melrose style spiral tip allows insertion without damage to the reproductive tract.

The spiral tip is made of a high quality thermoplastic rubber. *25 catheters per pack, 500 catheters per case, 35 cases per skid.*

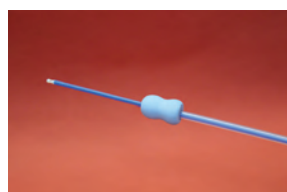

S6-5118 Spiral Catheter, 22" long without handle

S6-5155 Spiral Catheter, 22" long with handle

CATHETER HANDLES

Fits all spiral and foam catheters

S6-5116 Catheter Handles, 25/bag

I-U Foam Catheter Combo

INTRA-UTERINE CATHETER COMBO

S6-5620 Intra-uterine catheter inserted into a Complete Blue Foam Catheter
25 individually wrapped catheters/pk

INTRA-UTERINE CATHETER

These intra-uterine catheters are designed for use with any of our foam-tip catheters. The foam-tip catheter is inserted first, followed by the insertion of the intra-uterine catheter inside the tube of the foam catheter. Allow the sow to relax her cervix before attempting to insert the intra-uterine catheter. Packaged in bags of five catheters.

S6-5610 Intra-uterine Catheter, 5/pk

WRIST-SCAN ULTRASOUND PREGNANCY DETECTOR

Designed to be small, lightweight and simple to use, the Wrist-Scan is an affordable option for simple pregnancy diagnosis in swine as early as day 23 of gestation. It utilizes a mechanical abdominal probe. It comes complete with one abdominal probe, one rechargeable battery with a useful charge time of 2.5 hours, two wrist straps, and a hard-shell carrying case. A second battery is optional.

- S6-8700 Wrist Scan Ultrasound Pregnancy Detector
- S6-8710 Wrist Scan Abdominal Probe
- S6-8715 Wrist Scan Battery
- S6-8720 Wrist Scan Wrist Strap

EZ-CATCH HOG SNARE

Heavy duty construction compliments the unique free-fall design which allows the user to quickly set the snare with one hand. EZ Catch Hog Snare offers secure, one-handed holding that makes it possible to give injections, ear tag, etc. with the other hand. Made in the USA. No other snare can compare!

- S2-6000 EZ-Catch Hog Snare

EZ-Catch Hog Snare

SANI-PORC WIPES

- Sani-Porc Wipes are for use prior to breeding.
- The wet Sani-Porc Wipes are made of a non-woven material (polypropylene + viscose) which is very durable and soft to the skin.
- After cleaning, the product evaporates leaving the vulva clean and dry.
- The wipes are impregnated with an aqueous detergent solution.
